

Integrated sinks with watersafe edge profiles (edge 3).

Stainless steel worktops, wall cabinets and base cabinets.

Stainless steel worktops, wall cabinets and base cabinets.

Sector:	Healthcare
Room Type:	Operating Theatres
Client:	University Hospitals Birmingham, NHS Foundation Trust
Specifier:	Client

Ancillary rooms to a total of seven operating theatres were upgraded with stainless steel worktops, base cabinets and wall cabinets by GEC Anderson.

The ancillary rooms included anaesthetic and recovery areas, adjacent to the main theatres within the busy Heartlands Hospital in the Bordesley Green area of Birmingham.

Stainless steel worktops with integrated sinks and watersafe edge profiles were specified throughout. Base cabinet and drawer cabinets were included at low level. At high level, stainless steel wall cabinets provided additional storage.

Installation was handled by GEC Anderson and was conducted over two phases. An especially condensed installation period was met, to minimise disruption to the heavy workload associated with these vital areas within the hospital.

Founded in England in 1962, GEC Anderson has pioneered the development of made-to-measure stainless steel products. Today, the company's range also includes standard and modular stainless steel options. Products include sinks, worktops, cabinets, shelving, splashbacks, doors and sanitaryware for use in domestic, commercial and specialist environments. All products are manufactured to ISO 9001 and backed by a comprehensive support service from planning and product specification to installation and maintenance.
