Building:	Heartlands Hospital
Sector:	Healthcare
Room Type:	A & E Toilet Facilities
Client:	University Hospitals Birmingham, NHS Foundation Trust
Specifier:	Client

A & E department toilet facilities are in constant use, around the clock. It is therefore of paramount importance that they remain in good working order and with minimal maintenance. Clean, smart, professional and safe sanitary appliances are really what is expected in this environment.

When it came to upgrading the facilities at Birmingham's Heartlands Hospital, the decision was taken by the Estates Department to use WCs and urinals from stainless steel specialists, GEC Anderson Limited. Even though the cost of stainless steel sanitaryware can be significantly higher than alternatives, initially. However, when service life, maintenance issues and facilities out of service are taken into account, this cost can very soon be outweighed.

Founded in England in 1962, GEC Anderson has pioneered the development of made-to-measure stainless steel products. Today, the company's range also includes standard and modular stainless steel options. Products include sinks, worktops, cabinets, shelving, splashbacks, doors and sanitaryware for use in domestic, commercial and specialist environments. All products are manufactured to ISO 9001 and backed by a comprehensive support service from planning and product specification to installation and maintenance.
