

Custom made worktops integrated sink bowls.

Impressive U-shaped worktop configuration with plain edge (7) to front and sides and upstand (edge 10) at back.

**Building:** Dukes Mews

**Specifier:** CIE PLC

A total of three kitchens were supplied by GEC Anderson to this prestigious residential development, just off London's Portland Square.

CIE, who were commissioned to provide the kitchens, chose GEC Anderson to supply and fit the stainless steel worktops. GEC Anderson were the natural choice for CIE as they had worked many times with them in the past.

The detailing specified by CIE included upstands (edge 10) to all wall junctions, combined with a plain edge (7) to exposed edges. The large worktop coverage made access and installation into the tight mews homes quite challenging. The unique features of each kitchen, including columns and cutouts also made the accuracy in the measuring of the worktops very critical. Supply and installation of the worktops was handled by GEC Anderson.

Founded in England in 1962, GEC Anderson has pioneered the development of made-to-measure stainless steel products. Today, the company's range also includes standard and modular stainless steel options. Products include sinks, worktops, cabinets, shelving, splashbacks, doors and sanitaryware for use in domestic, commercial and specialist environments. All products are manufactured to ISO 9001 and backed by a comprehensive support service from planning and product specification to installation and maintenance.
