

Neat and practical worktops with lipped edge (3) to exposed edges and integral upstands (edge 10) to wall junctions.

Neat and practical worktops with lipped edge (3) to exposed edges and integral upstands (edge 10) to wall junctions.

<b>Building:</b>	Llwyncrwyn Primary School
<b>Room Type:</b>	Classroom Sinks
<b>Contractor:</b>	Amey Building

A series of stainless steel worktops were specified within classrooms of this Mid-Glamorgan Primary School.

A clean, neat and highly resilient result was achieved through the use of continuous worktops, with integrated sinks. Lipped edges (edge 3) were included to prevent spillage and to prevent items rolling-off the worktop onto the floor. Integral upstands were specified to the junctions between the worktop and walls, providing a highly practical and lasting result.

Founded in England in 1962, GEC Anderson has pioneered the development of made-to-measure stainless steel products. Today, the company's range also includes standard and modular stainless steel options. Products include sinks, worktops, cabinets, shelving, splashbacks, doors and sanitaryware for use in domestic, commercial and specialist environments. All products are manufactured to ISO 9001 and backed by a comprehensive support service from planning and product specification to installation and maintenance.
