

Integral back upstands.

Professional, hygienic and safe surgery space.

Integrated sink with watersafe edges.

Sector: Dentistry
Room Type: Dental surgery
Contractor: Client

A busy dental surgery, located near Newgate Street in the City of London, has been upgraded to include made-to-measure stainless steel worktops by GEC Anderson.

By eliminating unnecessary joins and junctions, a feeling of simplicity has been introduced into the compact surgery space. The sinks are seamlessly integrated within worktops and upstands where worktops meet walls were included for a professional, hygienic and robust solution to worksurface requirements.

Founded in England in 1962, GEC Anderson has pioneered the development of made-to-measure stainless steel products. Today, the company's range also includes standard and modular stainless steel options. Products include sinks, worktops, cabinets, shelving, splashbacks, doors and sanitaryware for use in domestic, commercial and specialist environments. All products are manufactured to ISO 9001 and backed by a comprehensive support service from planning and product specification to installation and maintenance.
