

L-shaped counter, formed in one piece.

Stainless steel worktops and sinktops.

Stainless steel café counters.

Building:	RIBA Cafe, Portland Place
Sector:	Professional Institute
Room Type:	Bars / restaurant
Client:	RIBA
Contractor:	Beck Interiors Limited

GEC Anderson stainless steel worktops were included in the revamped Café area within the prestigious RIBA Building on Portland Place, in London. The refurbishment works were carried out by Beck Interiors.

The small café space is adjacent to the main member's restaurant and provides small snacks and pastries as well as drinks and refreshments. The L-shaped stainless steel counter / sinktop was produced in one piece, providing not only an aesthetic advantage but also practicality, durability and hygiene.

Founded in England in 1962, GEC Anderson has pioneered the development of made-to-measure stainless steel products. Today, the company's range also includes standard and modular stainless steel options. Products include sinks, worktops, cabinets, shelving, splashbacks, doors and sanitaryware for use in domestic, commercial and specialist environments. All products are manufactured to ISO 9001 and backed by a comprehensive support service from planning and product specification to installation and maintenance.
