<b>Building:</b>	Fitzjohns Primary School, London
<b>Sector:</b>	Education
<b>Room Type:</b>	Class / art rooms
<b>Specifier:</b>	Curl la Tourelle Head Architecture
<b>Contractor:</b>	Woodbar Limited

GEC Anderson were chosen to supply stainless steel classroom worktops, drinking fountains as well as fabrications for the main school kitchen.

Classroom worktops have integrated sink bowls and are mounted on wall hung stainless steel base cabinets, also by GEC Anderson. The cantilever arrangement allows for uninterrupted floor cleaning and easier working and access to the sink units. It also facilitates the ability to mount the worktops at the height appropriate for pupils.

GB4000 wall hung drinking fountains were specified in the corridor areas. The units can be mounted at any height to ensure access for the children.

Within the main kitchen, sinks and worktops include leg frames with solid undershelves in order to maximise the limited space available.

Brushed satin stainless steel (EN 1.4301 grade) was used throughout.

Founded in England in 1962, GEC Anderson has pioneered the development of made-to-measure stainless steel products. Today, the company's range also includes standard and modular stainless steel options. Products include sinks, worktops, cabinets, shelving, splashbacks, doors and sanitaryware for use in domestic, commercial and specialist environments. All products are manufactured to ISO 9001 and backed by a comprehensive support service from planning and product specification to installation and maintenance.
