---

A series of special inset, textured finish, stainless steel sinktops were included in a recent upgrade to classrooms and art rooms within Exeter's Bidwell Brook School.

Chosen for their practicality and durability but also for their neat and clean appearance, the inset sinks feature lipped edges all round to prevent spillage.

Founded in England in 1962, GEC Anderson has pioneered the development of made-to-measure stainless steel products. Today, the company's range also includes standard and modular stainless steel options. Products include sinks, worktops, cabinets, shelving, splashbacks, doors and sanitaryware for use in domestic, commercial and specialist environments. All products are manufactured to ISO 9001 and backed by a comprehensive support service from planning and product specification to installation and maintenance.
