

New Reception Desk for Mission Communications

Glass inlays.

Stainless steel end panels.

Stainless steel counter and units.

Sector: Marketing
Room Type: Kitchenettes / Reception Area
Client: Mission Communications

Web developers, Mission Communications, were looking to make a positive impact on visitors to their West End offices.

Stainless steel specialists, GEC Anderson, were asked to provide the stainless steel elements, comprising surface, side-panels and shelf components that formed part of the main reception counter. With some imaginative use of lighting as well as glass panes, the result was very creative but also highly professional looking. Behind the main counter were some other stainless steel worktops as well as sinks that formed part of the office tea point and catering facilities.

GEC Anderson's usual EN 1.4301 grade brushed satin stainless steel was used throughout.

Founded in England in 1962, GEC Anderson has pioneered the development of made-to-measure stainless steel products. Today, the company's range also includes standard and modular stainless steel options. Products include sinks, worktops, cabinets, shelving, splashbacks, doors and sanitaryware for use in domestic, commercial and specialist environments. All products are manufactured to ISO 9001 and backed by a comprehensive support service from planning and product specification to installation and maintenance.
