Sector:	Culture and Arts
Room Type:	Kitchenettes, tea points
Specifier:	Felicity Atekpe, White Table
Contractor:	Angela Flowers Gallery Ltd

Flowers Gallery was first established in 1970 on Lisle Street in London's West End, more recently moving into a 12,000 sq foot industrial space in Shoreditch, East London. Now, Flowers have two gallery spaces in London and one in the United States. Flowers participates regularly in art fairs internationally. The programme in both the UK and US comprises all media by established and emerging artists. The gallery is an active publisher of prints and multiples with an established department in contemporary international photography.

When refurbished in 2014, Dan Flowers contacted GEC Anderson to produce a stainless steel worktop that would be incorporated into the gallery kitchen. The gallery kitchen is used on a daily basis by fifteen staff members and also by outside caterers that are hired to cater for exhibitions. The area is well used on a regular basis and needed to be long lasting and hygienic but also to look smart and professional.

Architect, Felicity Atekpe, of White Table Interior Designs in relation to the kitchen "I was trying to get a different kind of space from the normal gallery and wanted it all to be hues of blues and moody (restful) with the stainless steel as the sparkle. Dan suggested GEC Anderson. At the time I showed them photographs which were stills from the Japanese film Floating Weeds by Yasujiro Ozu but they chickened out of painting the walls darker and the floor... You never know though, they might yet."

Founded in England in 1962, GEC Anderson has pioneered the development of made-to-measure stainless steel products. Today, the company's range also includes standard and modular stainless steel options. Products include sinks, worktops, cabinets, shelving, splashbacks, doors and sanitaryware for use in domestic, commercial and specialist environments. All products are manufactured to ISO 9001 and backed by a comprehensive support service from planning and product specification to installation and maintenance.
