Specifier:	Foster + Partners

World renowned architects, Foster + Partners, have a new galley kitchen in their Hester Road studio which features bespoke sinks, surfaces and splashbacks supplied by GEC Anderson.

The GEC Anderson fabrications were produced through a series of meetings with the team so as to maximise the very compact space available for the kitchen. The items were delivered direct to site in Battersea for installation by specialist fitters CHC.

GEC Anderson create custom engineered solutions to fit any space or specification. In the case of the Foster + Partners studio, stainless steel worktops include integrated sinks as well as cut outs for taps and drip tray. 20mm plain front edges were specified together with the [water tight] integral back upstand. Stainless steel splashbacks were also included.

GEC Andersons stainless steel kitchen creations offer aesthetics, practicality and the ability to provide an easy to clean, hygienic, highly durable and long lasting environment.

Founded in England in 1962, GEC Anderson has pioneered the development of made-to-measure stainless steel products. Today, the company's range also includes standard and modular stainless steel options. Products include sinks, worktops, cabinets, shelving, splashbacks, doors and sanitaryware for use in domestic, commercial and specialist environments. All products are manufactured to ISO 9001 and backed by a comprehensive support service from planning and product specification to installation and maintenance.
