

**GEC ANDERSON WORKTOPS JUST THE TONIC FOR GMC HQ**

A70 sink, combined with LR37 circular sink.

GEC Anderson's clamp joint was used to enable access to the building.

40mm plain edge profile (7).

5m worktop with clamp joint to facilitate access to upper floors.

**Room Type:** Small commercial kitchen  
**Client:** General Medical Council  
**Contractor:** Carmelcrest Group

The General Medical Council protects patients and improves medical education and practice in the UK by setting and upholding standards for students and doctors.

GEC Anderson were employed to supply and install new worktops within its HQ building, located on London's Euston Road.

The project was undertaken by Carmelcrest who asked GEC Anderson to provide the new 5m worktop within the Pantry Kitchen. Access to the room was fairly restricted and, as it was on one of the upper floors of the tower, it was necessary to supply it in two sections. A clamp-joint was used to provide the near seamless and hygienic join. Two sinks were included at one end of the worktop whilst the other end provides the clear, plain, work surface required within the busy kitchen space.

Founded in England in 1962, GEC Anderson has pioneered the development of made-to-measure stainless steel products. Today, the company's range also includes standard and modular stainless steel options. Products include sinks, worktops, cabinets, shelving, splashbacks, doors and sanitaryware for use in domestic, commercial and specialist environments. All products are manufactured to ISO 9001 and backed by a comprehensive support service from planning and product specification to installation and maintenance.
