The Haggerston West & Kingsland development is a residential housing scheme undertaken and operated by the renowned L&Q group. Several blocks of buildings were featured within the project. A community kitchen was included within Block B.

Project architects, PRP specified the kitchen to be in stainless steel and GEC Anderson were awarded the task of supplying and installing the required units as well as the various electrical and gas appliances. The fully stainless steel kitchen was laid out in a symmetrical configuration and includes two sink areas, base cabinets, wall cabinets and drawer units. All units were lockable.

Other areas of the project were also supplied by GEC Anderson, including the nursery and baby change facilities.

Founded in England in 1962, GEC Anderson has pioneered the development of made-to-measure stainless steel products. Today, the company's range also includes standard and modular stainless steel options. Products include sinks, worktops, cabinets, shelving, splashbacks, doors and sanitaryware for use in domestic, commercial and specialist environments. All products are manufactured to ISO 9001 and backed by a comprehensive support service from planning and product specification to installation and maintenance.
