Specifier:	MICA Architects Ltd
Contractor:	Artemis Construction Limited

GEC Anderson stainless steel back bar counters and units were specified for the Foyer Bar and Mezzanine Kitchen at landmark London theatre, the Lyric.

Mica architects were asked to handle the extensive refurbishment and GEC Anderson were awarded the contract to supply and install their specialist back bar equipment. Although the overall area of the bar is quite large, including all of the required items and equipment within its confines was quite challenging. Careful planning and design was necessary to achieve it and some unique fabrications and inventive use of available space were needed. Careful co-ordination and liaison between the GEC Anderson, the theatre and the design team enabled the end result to be realised.

Founded in England in 1962, GEC Anderson has pioneered the development of made-to-measure stainless steel products. Today, the company's range also includes standard and modular stainless steel options. Products include sinks, worktops, cabinets, shelving, splashbacks, doors and sanitaryware for use in domestic, commercial and specialist environments. All products are manufactured to ISO 9001 and backed by a comprehensive support service from planning and product specification to installation and maintenance.
