Sector:	Development
Room Type:	Domestic kitchen
Specifier:	Robin Lee Architecture
Contractor:	Evolve Creative Consulting Ltd

GEC Anderson were recently chosen to work with Robin Lee Architecture in a highly creative multi-level residential apartment development in London's Bayswater.

The design process was lead by Architect, Robin Lee but was closely followed by his client and included significant collaboration with GEC Anderson who supplied and installed the stainless steel kitchen, including the associated appliances.

To some, the kitchen may look to comprise standard or modular units but, in fact, every piece was individually and meticulously designed so as to maximise its functionality and use of space but also to provide it with its own unique and interesting visual features. A series of niches and shelf spaces were included to really maximise the use of space and to imbue the kitchen with creativity.

Founded in England in 1962, GEC Anderson has pioneered the development of made-to-measure stainless steel products. Today, the company's range also includes standard and modular stainless steel options. Products include sinks, worktops, cabinets, shelving, splashbacks, doors and sanitaryware for use in domestic, commercial and specialist environments. All products are manufactured to ISO 9001 and backed by a comprehensive support service from planning and product specification to installation and maintenance.
