V90 stainless steel shelving.

Building:	Empress State Building
Room Type:	Property Store Room
Client:	Metropolitan Police
Specifier:	Hamilton Architects
Contractor:	BA Joinery

A recent upgrade to the prestigious Empress State Building for the Metropolitan Police was conducted by main contractor, Overbury.

As part of the works, stainless steel shelving by GEC Anderson was specified to the visitor's property store room. The room was very irregularly shaped and so the shelving (5 tiers of 500mm wide shelves) was specially made to suit. A total of 75 metres of shelving was supplied and installed by GEC Anderson for specialist sub contractor, BA Joinery.

Founded in England in 1962, GEC Anderson has pioneered the development of made-to-measure stainless steel products. Today, the company's range also includes standard and modular stainless steel options. Products include sinks, worktops, cabinets, shelving, splashbacks, doors and sanitaryware for use in domestic, commercial and specialist environments. All products are manufactured to ISO 9001 and backed by a comprehensive support service from planning and product specification to installation and maintenance.
