Stainless steel kitchen counters and sinks.

Building:	The Old Deanery, London
Sector:	Religion
Room Type:	Small commercial kitchen
Client:	
Specifier:	Caroe Architecture Ltd
Contractor:	Sykes & Son Limited

The main kitchen at the Old Deanery, official residence to the Bishop of London, was part of a major refurbishment of this historic home, lying in the shadow of St Paul's Cathedral.

Situated on the first floor, the main kitchen is a very compact room and this presented special challenges to its design. The available space was truly maximised under the design of Caroe Architects and it was then the task of GEC Anderson to measure, supply and install the specialist fabrications as well as the many appliances.

Sykes & Son Ltd were awarded the main contact for the the total refurbishment project.

Founded in England in 1962, GEC Anderson has pioneered the development of made-to-measure stainless steel products. Today, the company's range also includes standard and modular stainless steel options. Products include sinks, worktops, cabinets, shelving, splashbacks, doors and sanitaryware for use in domestic, commercial and specialist environments. All products are manufactured to ISO 9001 and backed by a comprehensive support service from planning and product specification to installation and maintenance.
