

Sinktop with AD34 double bowls and stainless steel splashback

Stainless steel alcove

Stainless steel island and sinktop

Stainless steel island worktop with flush mount hob, side and back panels

Building: West London Kitchen
Room Type: Residential Kitchen
Specifier: Client

GEC Anderson were recently asked to provide replacement worktops, splashbacks and panels within a chic West London home.

Although the existing units and joinery were in a very good condition, the composite worktops and panelling were beginning to show signs of wear. The brief was to remove the three existing worktops as well as their associated panels (splashbacks, side panels, back panels as well as one soffit panel) and to replace with brushed satin stainless steel equivalents. Included within the remit was the reuse of the flush fitting hob, pop-up extraction unit with its controls as well as the provision of a pop-up socket system.

20mm plain edges were specified (GEC Anderson edge detail 7). The double sinks were from the modern Series A range.

The project was measured, manufactured and installed by GEC Anderson.

Founded in England in 1962, GEC Anderson has pioneered the development of made-to-measure stainless steel products. Today, the company's range also includes standard and modular stainless steel options. Products include sinks, worktops, cabinets, shelving, splashbacks, doors and sanitaryware for use in domestic, commercial and specialist environments. All products are manufactured to ISO 9001 and backed by a comprehensive support service from planning and product specification to installation and maintenance.
