<b>Specifier:</b>	William Smalley RIBA
<b>Contractor:</b>	Zota Ltd

---

This beautiful and contemporary kitchen formed part of a complete refurbishment designed and overseen by William Smalley RIBA. The main contractor was Zota Ltd.

GEC Anderson was commissioned to manufacture and install a made to measure stainless steel island worktop: edge 7 (50mm plain edge) with an integral sink (A40) and intricate cutouts for a range cooker and a large wooden worktop. The kitchen design also included a number of stainless steel cabinet doors and a large stainless steel shelved unit.

There was a separate integrated sink with drainer and splashback as well as an overhead stainless steel extractor canopy. A further worktop and splashback were included in the pool area behind the house.

EN 1.4301 grade brushed satin stainless steel was used throughout.

Founded in England in 1962, GEC Anderson has pioneered the development of made-to-measure stainless steel products. Today, the company's range also includes standard and modular stainless steel options. Products include sinks, worktops, cabinets, shelving, splashbacks, doors and sanitaryware for use in domestic, commercial and specialist environments. All products are manufactured to ISO 9001 and backed by a comprehensive support service from planning and product specification to installation and maintenance.
