

Integrated back upstands provide robust detailing

30mm edge profile (edge 7)

Two worktops and window sills were supplied in stainless steel

Main worktop with sinks, cutout for column and back upstand

**Sector:** Private  
**Room Type:** Residential Kitchen

GEC Anderson were commissioned to measure, manufacture and install custom brushed stain stainless steel worktops for this bright modern contemporary kitchen.

Featuring prominent orange cabinets, manufactured by Quirky Carpentry and brightly glazed floor tiles, the stainless steel worktops complement the kitchen beautifully.

The stainless steel worktops include GEC Anderson's edge 7 (30mm) as well as upstand edge 10 at back (60x12mm). Integrated sinks LE34 and LE18 were combined within a shallow draining area and a single taphole was set within the draining zone. A single hob cut-out was also required.

The main run of worktop includes a back cutout for a structural column and the back upstand follows this detail. GEC Anderson also supplied two stainless steel window sills to complete the co-ordinated and contemporary look.
