

Contemporary Edinburgh Kitchen

Stainless steel worktops with edge 7 (20mm) and splashback

Integrated A45 and A23 sink bowls

Stainless steel splashback with utensil rail

Galley kitchen with stainless steel worktops and splashbacks

Sector:	Residential
Room Type:	Residential Kitchen
Contractor:	Fernandes Binns Architects Ltd

GEC Anderson were commissioned by Fernandes Binns Architects Ltd to manufacture two made to measure brushed satin stainless steel worktops for a residential redevelopment in Edinburgh.

Contrasting nicely with the neutral wooden cabinetry, the brushed satin stainless steel worktops include GEC Anderson's minimal edge 7 (20mm), with one worktop including integral upstand edge 10 at the back (165mm). A splashback with socket cut-outs and provision for utensil rail was also included.

Integrated sinks A23 and A45 were combined to provide generous sink capacity, maximised with their 10mm corner radius. A sloped inline drainer provides a sleek and practical wet zone to one side of the sinks. A hob cutout and also a corner cut-out were also required.

Founded in England in 1962, GEC Anderson has pioneered the development of made-to-measure stainless steel products. Today, the company's range also includes standard and modular stainless steel options. Products include sinks, worktops, cabinets, shelving, splashbacks, doors and sanitaryware for use in domestic, commercial and specialist environments. All products are manufactured to ISO 9001 and backed by a comprehensive support service from planning and product specification to installation and maintenance.
