

Main Kitchen stainless steel worktop

L-shaped stainless steel worktop to the Art Area

Stainless steel splashbacks to the Outside Play Area

Serving Area and General Play Area

<b>Building:</b>	Nursery School
<b>Sector:</b>	Education
<b>Room Type:</b>	Kitchen and Washing areas

The established and successful, Aunties Old School Nursery, is moving to purpose built new premises located on the outskirts of Oxford. Surrounded by beautiful countryside, the brand new building has been designed and built to a very high standard and provides a truly inspiring space for its staff as well as for its pupils.

Working directly for the nursery, GEC Anderson were commissioned to measure, manufacture and install a number of made to measure stainless steel worktops for the main kitchen and serving area; art area; store room, utility room; staff room as well as the general play area. Additionally, a number of splashbacks and panels were supplied in the washrooms and outdoor play areas.

Worktops feature GEC Anderson's edge 7 (40mm) and were all made to the specific sizes required, including a curved and angled serving area to the main kitchen. Coloured wall tiles were installed prior to the worktops, so the fit needed to be very precise. Cutouts for appliances were provided where required.

Measuring and installation was carried out by GEC Anderson.

Founded in England in 1962, GEC Anderson has pioneered the development of made-to-measure stainless steel products. Today, the company's range also includes standard and modular stainless steel options. Products include sinks, worktops, cabinets, shelving, splashbacks, doors and sanitaryware for use in domestic, commercial and specialist environments. All products are manufactured to ISO 9001 and backed by a comprehensive support service from planning and product specification to installation and maintenance.
