

GEC Anderson Stepless Stainless Steel Shelving System (V90)

Shelves are available in widths of 200, 300, 400 and 500mm

Shelves are made to order in lengths of up to 4000mm

The V90 stepless adjustment system allows for great flexibility

Smart, durable, versatile and attractive

The GEC Anderson 3-part V90 stainless steel shelving system, comprising of shelves, uprights and brackets, can be used to create versatile, durable, hygienic and attractive configurations suited to a wide range of applications.

The uprights of each stainless steel shelving unit allow simple 'stepless' adjustment (un-slotted linear adjustment) of shelf positions to wherever required using a single locating bolt per bracket. This versatile system provides more ergonomic and efficient way of working for the user.

Specifications are as follows:

- Shelf lengths of up to 4000mm
- Shelf widths: 200 / 300 / 400 / 500mm
- Uprights: 400 / 600 / 800 / 1000 / 1500 / 1800 / 2000mm
- Brackets: 170 / 270 / 370 / 470 / 570mm
- Solid shelves.
- Option: perforated shelves (eg. to allow for drying)

Individual components are also available separately, for use in combination with other materials. Eg. glass shelves

Manufactured from EN 1.4301 grade brushed satin stainless steel. Optionally, available in EN 1.4401 grade acid resisting stainless steel.
